

Hello. I am Darji Priya RajeshKumar, and I am currently a student of computer engineering. Firstly, I want to apologize, as I am unable to make a video because I have an infection in my eyes. I hope you understand.

Talking about my studies, I completed the 12th grade at New Leap Junior Science College, Modasa. As a student of PCM, I worked very hard in all my exams and got enrolled in Computer engineering at GECM. For the past 2 years, I have been related to this tech world but have been slowly and gradually taking my steps towards it. Right now, I am in my third year and looking forward to this engineering journey and making it more interesting by contributing to this club.

Now, talking about myself, I am a good listener as well as a good speaker. I have had various experiences of hosting events as I contribute to other clubs too. A very important skill that is needed to be a part of any club is having good group skills. I think I have all those group skills, like communication, creativity, critical thinking, leadership qualities, problem solving, time management, and convincing skills. I am a good human being who respects every individual.

Apart from my tech skills, I am also into music. I am learning an instrument called guitar with the Indian classical music. I also like to read, draw, write poems, etc. So, this was all about me. Thank you.
